Minimal Submittal Requirements for Permit

Applicant must provide 3 sets of the following:

- An affidavit by the property owner stating that he/she understands that he/she retains responsibility for the requirements of Article X.5.
 - The protected tree(s) outside the uncontested area that the property owner proposes to remove, subject to the following requirement:
 1. Certification shall be submitted by a landscape architect, landscape contractor or an arborist licensed as such by the State of Louisiana that there are good reasons for the removal of such tree(s) from the site including a brief statement of those reasons.
 2. Supporting documentation may be submitted as to why the tree should be removed. This documentation may include, but is not limited to, written reports by a Louisiana state licensed structural engineer regarding existing or certain future damage caused by the tree to a structure, or documentation by other Louisiana state licensed professional documenting why the tree should be removed. Any documentation provided by a Louisiana state licensed professional shall include his official seal or license number, as applicable.
 - Current survey stamped by a Registered Land Surveyor.
 - Site plan including, but not limited to, the following with all dimensions shown:
 1. All property lines
 2. Buildable area of the property
 3. Location of existing buildings, structures, driveways, sidewalks, fences, chainwalls and similar features
 4. All proposed construction activity
 5. Location of base of tree, size, drip line and name of all trees
 6. All trees on abutting properties within ten (10) feet of the property line (if any)
 7. All trees within the public right of way (if any)
 8. Any trees within the uncontested removal area that are to be removed.
 - A tree protection plan that complies with the tree protection minimal requirements set forth in this article, including both graphics and text, and prepared, signed and affixed with seal or license number, by one of the following, as appropriate and in compliance with all state laws pertaining to professions regulated by the Louisiana Horticultural Commission:
 1. A State licensed landscape architect
 2. A State licensed landscape contractor
 3. A State licensed arborist.

The licensed professional must note on the plan or on a separate document that the proposed tree protection is in place. By installing the proposed protection before the application is submitted, the review and approval of your case can be processed in a much shorter period of time.
 - This tree protection plan may be shown on the required site plan.
 - Replacement tree option affidavit must be notarized and one of the two options checked: Trees will be replaced or payment will be made to Dept. of Parkway.
 - Site photos that adequately show existing trees located on the following:
 1. The applicant's property
 2. All abutting properties within ten (10) feet of the property line, if any.
- NOTE: Permit applications for special permitted uses that have already been approved by the Parish Council may use the previously approved site plans and tree protection plans in lieu of the requirements of this article.**

SAMPLE TREE PROTECTION PLAN
(Do not include this sample sheet with application)
